This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

CASE HISTORY

1. **01.14.2004** – A Final Office Action was mailed to the Applicants.
2. **04.18.2004** – A first reply responding to the Final Office Action was faxed to the USPTO.
3. **05.05.2004** – An Advisory Action was mailed to Applicants indicating that the first reply fails to place the application in condition for allowance.
4. **05.26.2004** – A telephonic interview was held.
5. **05.27.2004** – A second reply responding to the Final Office Action was faxed to the USPTO. In such second reply, Applicants amended the claims and believed that such amendments would place the application in condition for allowance in light of the telephonic interview with the Examiner. Regarding Applicants' faxing of the second reply to the USPTO, Applicants do have a confirmation from Applicants' fax machine but does not have any confirmation from the USPTO regarding its receipt of the second reply.
6. **06.16.2004** – An Interview Summary was mailed to Applicants.
7. **09.15.2004** – The Examiner called Applicants indicating that the application has been abandoned. During the call, the Examiner also stated that the Examiner did not receive the second reply, which Applicants had faxed to the Examiner on 05.27.2004. Thus, at this time, Applicants believed that the application was incorrectly abandoned because [1] the Examiner did not receive the second reply and [2] Applicants still believed that the amended claims in the second reply would place the application in condition for allowance.
8. **09.17.2004** – Based on the verbal notification by the Examiner that the application has been abandoned, Applicants filed a first Petition to Withdraw Holding of Abandonment because, at that time, Applicants believed that the application was incorrectly abandoned for the following reasons: [1] the second reply might have been misplaced once it was received by the USPTO and [2] Applicants still believed that the amended claims in the second reply would place the application in condition for allowance. In such petition, Applicants also included the confirmation from Applicants' own fax machine to show that the second reply had been faxed by Applicants and that the USPTO should have received it.

9. **03.22.2005** – A Notice of Abandonment was mailed to Applicants. In such notice, the Examiner indicated that the first reply (see above Statement 1) and the second reply (see above Statements 5 and 8) had been considered by the Examiner but both of such replies still fail to place the application in condition for allowance. Accordingly, Applicants had failed to timely respond to the Final Office Action dated 01.14.04.

10. **04.05.2005** – Applicants filed [1] a Request for Continued Examination (RCE) and [2] a second Petition to Withdraw Holding of Abandonment by presenting similar facts as those being presented in the first Petition to Withdraw Holding of Abandonment (see Statement 8). Applicants now, i.e., as of **04.21.2006**, realize that, instead of filing the second Petition to Withdraw Holding of Abandonment, **Applicants should have filed a petition to revive an unintentionally abandoned application under 37 CFR 1.137(b).**

11. **06.30.2005** – In response to Applicants' filing of the RCE and the second Petition to Withdraw Holding of Abandonment, a Non-Final Office Action was improperly mailed to Applicants in light of Statement 10. **The USPTO should have mailed a decision denying Applicants' second Petition to Withdraw Holding of Abandonment.**

10. **12.28.2005** – A reply responding to the Non-Final Office Action was faxed to USPTO. Applicants would like to note that **Applicants should have known that the application had been abandoned but respectfully submit that Applicants did not realize its abandonment at this time especially in light of receiving the Non-Final Office Action from the USPTO.**

11. **03.09.2006** – A telephonic conversation between the Examiner and Applicants' representative Peng Zhu (Reg. No. 48,063) occurred during which the parties discussed the history of this application especially regarding its abandonment.

12. **03.24.2006** – A decision denying Applicants' second Petition to Withdraw Holding of Abandonment was mailed to Applicants.

REMARKS

Based on the case history discussed above, this petition to revive the unintentionally abandoned application is in compliance with 37 C.F.R. §1.137. The undersigned respectfully requests that all papers of record, **except for the Petition to Withdraw Holding of Abandonment**, filed between April 5, 2005 and December 28, 2005 be re-instated and that prosecution be continued. Enclosed are copies of the items filed between April 5, 2005 and December 28, 2005 identified as Exhibit A and Exhibit B.

The undersigned declares further that all statements made herein are of his or her own knowledge are true and that statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Respectfully submitted,

**REQUEST
FOR
CONTINUED EXAMINATION (RCE)
TRANSMITTAL**

Section (b) of 35 U.S.C. § 132, effective on May 29, 2000,
provides for continued examination of an utility or plant application
filed on or after June 8, 1995.
See The American Inventors Protection Act of 1999 (AIPA).

Application Number	09/698,526
Filing Date	October 26, 2000
First Named Inventor	Dan Vassilovski
Group Art Unit	2124
Examiner Name	William H. Wood
Attorney Docket Number	990301

This is a Request for Continued Examination (RCE) under 37 C.F.R. § 1.114 of the above-identified application.
NOTE: 37 C.F.R. § 1.114 is effective on May 29, 2000. If the above-identified application was filed prior to May 29, 2000, applicant may wish to consider filing a continued prosecution application (CPA) under 37 C.F.R. § 1.134(i) (PTO Rule 29) instead of a RCE to be eligible for the patent term adjustment provisions of the AIPA. See Changes to Application Examination and Provisional Application Practice, Final Rule, 65 Fed. Reg. 50992 (Aug. 16, 2000); Interim Rule, 43 Fed. Reg. 14863 (Mar. 30, 2000), 1233 Off. Gaz. Pat. Office 47 (Apr. 11, 2000), which estimated RCE practice.

1. Submission required under 37 C.F.R. § 1.114

- a. ☐ Previously submitted
- i. ☐ Consider the amendment(s)/reply under 37 C.F.R. § 1.116 previously filed on
- ii. ☐ Consider the arguments in the Appeal Brief or Reply Brief previously filed on
- iii. ☐ Other
- b. ☒ Enclosed
- i. ☒ Amendment/Reply
- ii. ☐ Affidavit(s)/Declaration(s)
- iii. ☐ Information Disclosure Statement (IDS)
- iv. ☐ Other

2. Miscellaneous

- a. ☐ Suspension of action on the above-identified application is requested under 37 C.F.R. § 1.103(c) for a period of _____ months. (Period of suspension shall not exceed 3 months; Fee under 37 C.F.R. § 1.17(f) required)
- b. ☒ Other Petition to Withdraw Holding of Abandonment Under 37 CFR 1.181(a)

3. Fees The RCE fee under 37 C.F.R. § 1.17(e) is required by 37 C.F.R. § 1.114 which the RCE is filed.

- a. ☒ The Director is hereby authorized to charge the following fees, or credit any overpayments, to Deposit Account No. 17-0026
- i. ☒ RCE fee required under 37 C.F.R. § 1.17(e)
- ii. ☐ Extension of time fee (37 C.F.R. §§ 1.136 and 1.117)
- iii. ☐ Other
- b. ☐ Check in the amount of \$ _____ enclosed
- c. ☐ Payment by credit card (Form PTO-2038 enclosed)

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A method for configuration management for a computing device, comprising:

providing available software to be loaded into said computing device to update a resident software within said computing device through an interface;

determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;

determining whether or not said available software is authenticated;

loading updating said resident software with said available software ~~into said storage device~~ if said resident software has not been authenticated; and

setting an authentication flag if said resident software is not authenticated but said available software is authenticated.

2. (Currently Amended) A method for configuration management for a computing device, comprising:

providing available software to be loaded into said computing device to update a resident software within said computing device through an interface;

determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;

determining whether or not said available software is authenticated;

rejecting said available software if said resident software is authenticated and said available software is not authenticated; and

loading updating said resident software with said available software if one of the following three conditions is met:

(1) said resident software is not authenticated and said available software is are authenticated,

(2) said resident software and said available software are not authenticated,

(3) said resident software is not authenticated but said available software is authenticated.

3. (Previously Presented) The method of claim 2 wherein said determining whether or not said resident software is authenticated comprises of:

determining whether or not an authentication flag has been set;
wherein said resident software is determined to be authenticated if an authentication flag has been set; otherwise
said resident software is determined to be unauthenticated.

4. (Currently Amended) The method of claim 3 wherein said authentication flag is set when said authenticated software is loaded onto said computing device if said resident software is not authenticated but said available software is authenticated.

5. (Previously Presented) The method of claim 4 wherein said authentication flag is set by a service technician.

6. (Previously Presented) The method of claim 2 wherein said determining whether or not said resident software is authenticated comprises of performing a direct authentication procedure on said resident software.

7. (Previously Presented) The method of claim 6 wherein said performing a direct authentication procedure comprises performing a cyclic redundancy check.

8. (Previously Presented) The method of claim 6 wherein said performing a direct authentication procedure comprises performing a secure hashing algorithm.

9. (Currently Amended) An apparatus for performing configuration management for a computing device, comprising:

an interface for providing available software to be loaded into said computing device to update a resident software within said computing device;

a storage device for storing said resident software and a set of executable computer instructions for determining whether or not said available software and said resident software are authenticated;

a processor for executing said set of executable computer instructions and for: loading updating said resident software with said available software ~~into said computing device~~ if said resident software is not authenticated; and

setting an authentication flag if said resident software is not authenticated but said available software is authenticated.

10. (Currently Amended) An apparatus for performing configuration

management for a computing device, comprising:

an interface for providing available software to be loaded into said computing device to update a resident software within said computing device;

a storage device for storing said resident software and a set of executable computer instructions for determining whether or not said available software and said resident software are authenticated;

a processor for executing said set of executable computer instructions and for:

rejecting said available software if said resident software has been authenticated and said available software is not authenticated; and

loading updating said resident software with said available software if one of the following three conditions is met:

(1) ~~said resident software is authenticated~~ and said available software is are authenticated,

(2) said resident software and said available software are not authenticated,

(3) said resident software is not authenticated but said available software is authenticated.

11. (Previously Presented) The apparatus of claim 10 wherein:

said storage device is further for storing an authentication flag for indicating the authentication status of said computing device; and

said processor is further for determining whether or not said resident software is authenticated based on said authentication flag.

12. (Currently Amended) The apparatus of claim 11 wherein said authentication flag is set when said authenticated software is loaded onto said computing device if said resident software is not authenticated but said available software is authenticated.

13. (Currently Amended) The apparatus of claim 12[[1]] wherein said authentication flag is set by a service technician.

14. (Previously Presented) The apparatus of claim 10 wherein said processor is further for performing a direct authentication procedure on said resident software to determine whether or not said resident software is authenticated.

15. (Previously Presented) The apparatus of claim 14 wherein said performing a direct authentication procedure comprises performing a cyclic redundancy check.

16. (Previously Presented) The apparatus of claim 14 wherein said performing a direct authentication procedure comprises performing a secure hashing algorithm.

17. (Currently Amended) An apparatus for configuration management for a computing device, comprising:

means for providing available software to be loaded into said computing device to update a resident software within said computing device ~~through an interface~~;

means for determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;

means for determining whether or not said available software is authenticated;

means for ~~loading~~ updating said resident software with said available software ~~into said storage device~~ if said resident software has not been authenticated; and

means for setting an authentication flag if said resident software is not authenticated ~~but~~ said available software is authenticated.

18. (Currently Amended) An apparatus for implementing a method for configuration management for a computing device, comprising:

means for providing available software to be loaded into said computing device to update a resident software within said computing device through an interface;

means for determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;

means for determining whether or not said available software is authenticated;

means for rejecting said available software if said resident software is authenticated and said available software is not authenticated; and

means for ~~loading~~ updating said resident software with said available software if one of the following three conditions is met:

(1) ~~said resident software is authenticated~~ and said available software is are authenticated,

(2) said resident software and said available software are not authenticated,

(3) said resident software is not authenticated but said available software is authenticated.

19. (Currently Amended) A computer-readable medium embodying codes for implementing a method for configuration management for a computing device, the method comprising :

providing available software to be loaded into said computing device to update a resident software within said computing device ~~through an interface~~;

determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;

determining whether or not said available software is authenticated;

~~loading~~ updating said resident software with said available software ~~into said storage device~~ if said resident software has not been authenticated; and

setting an authentication flag if said resident software is not authenticated but said available software is authenticated.

20. (Currently Amended) A computer-readable medium embodying codes for implementing a method for configuration management for a computing device, comprising:

providing available software to be loaded into said computing device to update a resident software within said computing device ~~through an interface~~;

determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;

determining whether or not said available software is authenticated;

rejecting said available software if said resident software is authenticated and said available software is not authenticated; and

loading updating said resident software with said available software if one of the following three conditions is met:

(1) ~~said resident software is authenticated~~ and said available software ~~is~~ are authenticated;

(2) said resident software and said available software are not authenticated;

(3) said resident software is not authenticated but said available software is authenticated.

REMARKS

Claims 1-20 are pending in the present application. In the above amendments, claims 1, 2, 4, 9-10, 12-13 and 17-20 have been amended. Therefore, after entry of the above amendments, claims 1-20 will be still pending in this application. Applicants believe that the present application is now in condition for allowance, which prompt and favorable action is respectfully requested.

1. Rejection under 35 U.S.C. Section 102(e)

The Examiner rejected Claims 2-3, 5-6, 10-11, 13-14, 18, and 20 are being allegedly anticipated by U.S. Patent No. 6,381,741 issued to Shaw. Applicants respectfully traverse this rejection.

Per Claims 2, 10, 18, and 20, Applicants respectfully submit that Shaw does not disclose "updating said resident software with said available software if one of the following three conditions is met: (1) said resident software and said available software are authenticated, (2) said resident software and said available software are not authenticated, or (3) said resident software is not authenticated but said available software is authenticated," as now claimed. The support for this limitation is provided by FIG. 2, for example.

Shaw only discloses testing whether resident software (e.g., application code 26) is intact. (See col. 3, lines 66-67, and FIG. 2, block 130). In Shaw, neither in col. 3, line 66 to col. 4, line 3; col. 5, lines 34-41; nor anywhere else, is there a mention of testing authenticity of the available software (e.g., Downloader 70). In col. 5, lines 34-41, the Downloader 70 is not checked for authenticity for the purpose of deciding whether to update the application code 26. Rather, after the Downloader 70 has been already downloaded it is authenticated and validated. (See col. 5, lines 34-35).

Furthermore, Shaw does not disclose "rejecting said available software if said resident software is authenticated and said available software is not authenticated." In col. 3, line 66 to col. 4, line 5, only the resident program is checked, and if it is corrupt it would be updated. This is totally different from the above claimed limitations.

Therefore, since Shaw does not disclose at least the above limitations, Applicants respectfully request the Examiner to withdraw this rejection.

2. Rejection under 35 U.S.C. Section 103(a)

The Examiner rejected Claims 1, 4, 9, 12, 17 and 19 are being allegedly unpatentable over U.S. Patent No. 6,381,741 issued to Shaw. Applicants respectfully traverse this rejection.

Applicants respectfully submit that Shaw does not disclose "setting an authentication flag if said resident software is not authenticated and said available software is authenticated," for the reason that Shaw does not disclose "determining whether or not said available software is authenticated." Shaw only discloses testing whether resident software (e.g., application code 26) is intact. (See col. 3, lines 66-67, and FIG. 2, block 130). In Shaw, neither in col. 3, line 66 to col. 4, line 3; col. 5, lines 34-41; nor anywhere else, is there a mention of testing authenticity of the available software (e.g., Downloader 70). In col. 5, lines 34-41, the Downloader 70 is not checked for authenticity for the purpose of deciding whether to update the application code 26. Rather, after the code has been already downloaded it is authenticated and validated. (See col. 5, lines 34-35).

Therefore, since Shaw does not disclose at least the above limitations, Applicants respectfully request the Examiner to withdraw this rejection.

CONCLUSION

In light of the amendments contained herein, Applicants submit that the application is in condition for allowance, for which early action is requested.

Please charge any fees or overpayments that may be due with this response to Deposit Account No. 17-0026.

Respectfully submitted,

Attorney Docket No. 990301

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A method for configuration management for a computing device, comprising:
 - providing available software to be loaded into said computing device to update a resident software within said computing device;
 - determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;
 - determining whether or not said available software is authenticated;
 - updating said resident software with said available software if said resident software and said available software are has not been authenticated; and
 - setting an authentication flag if said resident software is not authenticated but and said available software is authenticated; and
 - updating said resident software if said resident software is not authenticated but and said available software is authenticated.
2. (Currently Amended) A method for configuration management for a computing device, comprising:
 - providing available software to be loaded into said computing device to update a resident software within said computing device;
 - determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;
 - determining whether or not said available software is authenticated;
 - rejecting said available software if said resident software is authenticated and said available software is not authenticated; and
 - updating said resident software with said available software if one of the following three conditions is met;
 - (1) said resident software and said available software are authenticated,
 - (2) said resident software and said available software are not authenticated,
 - (3) said resident software is not authenticated but said available software is authenticated.
3. (Previously Presented) The method of claim 2 wherein said determining

Attorney Docket No. 990301

whether or not said resident software is authenticated comprises of:

determining whether or not an authentication flag has been set;
wherein said resident software is determined to be authenticated if an authentication flag has been set; otherwise
said resident software is determined to be unauthenticated.

4. (Previously Presented) The method of claim 3 wherein said authentication flag is set when said authenticated software is loaded onto said computing device if said resident software is not authenticated but said available software is authenticated.

5. (Previously Presented) The method of claim 4 wherein said authentication flag is set by a service technician.

6. (Previously Presented) The method of claim 2 wherein said determining whether or not said resident software is authenticated comprises of performing a direct authentication procedure on said resident software.

7. (Previously Presented) The method of claim 6 wherein said performing a direct authentication procedure comprises performing a cyclic redundancy check.

8. (Previously Presented) The method of claim 6 wherein said performing a direct authentication procedure comprises performing a secure hashing algorithm.

9 - 20. (Canceled).

21. (New) An apparatus for configuration management for a computing device, comprising:

means for providing available software to be loaded into said computing device to update a resident software within said computing device;
means for determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;
means for determining whether or not said available software is authenticated;
means for updating said resident software with said available software if said resident software and said available software are not authenticated;
means for setting an authentication flag if said resident software is not authenticated but said available software is authenticated; and

Attorney Docket No. 990301

means for updating said resident software if said resident software is not authenticated but said available software is authenticated.

22. (New) An apparatus for configuration management for a computing device, comprising:

means for providing available software to be loaded into said computing device to update a resident software within said computing device;

means for determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;

means for determining whether or not said available software is authenticated;

means for rejecting said available software if said resident software is authenticated and said available software is not authenticated; and

means for updating said resident software with said available software if one of the following three conditions is met:

(1) said resident software and said available software are authenticated,

(2) said resident software and said available software are not authenticated,

(3) said resident software is not authenticated but said available software is authenticated.

23. (New) A computer-readable medium embodying instruction, which when executed by a processor, implement a method for configuration management for a computing device, the method comprising:

providing available software to be loaded into said computing device to update a resident software within said computing device;

determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;

determining whether or not said available software is authenticated;

updating said resident software with said available software if said resident software and said available software are not authenticated;

setting an authentication flag if said resident software is not authenticated but said available software is authenticated; and

updating said resident software if said resident software is not authenticated but said available software is authenticated.

24. (New) A computer-readable medium embodying instruction, which when

Attorney Docket No. 990301

executed by a processor, implement a method for configuration management for a computing device, the method comprising:

providing available software to be loaded into said computing device to update a resident software within said computing device;

determining whether or not said resident software stored in a storage device associated with said computing device is authenticated;

determining whether or not said available software is authenticated;

rejecting said available software if said resident software is authenticated and said available software is not authenticated; and

updating said resident software with said available software if one of the following three conditions is met;

- (1) said resident software and said available software are authenticated,
- (2) said resident software and said available software are not authenticated,
- (3) said resident software is not authenticated but said available software is authenticated.

Attorney Docket No. 990301

REMARKS

Claims 1-20 are pending in the present application. In the above amendments, claims 1-2 have been amended, claims 9-20 are canceled, and new claims 21-24 are added. Therefore, after entry of the above amendments, claims 1-8 and 21-24 will be pending in this application. Applicants believe that the present application is now in condition for allowance, which prompt and favorable action is respectfully requested.

1. Rejection under 35 U.S.C. Section 102(e)

The Examiner rejected Claims 2-3, 5-6, 10-11, 13-14, 18, and 20 are being allegedly anticipated by U.S. Patent No. 6,381,741 issued to Shaw. Applicants respectfully traverse this rejection.

Per Claims 2, 22, and 24, Applicants respectfully submit that Shaw does not disclose "rejecting said available software if said resident software is authenticated and said available software is not authenticated; updating said resident software with said available software if one of the following three conditions is met: (1) said resident software and said available software are authenticated, (2) said resident software and said available software are not authenticated, or (3) said resident software is not authenticated but said available software is authenticated," as now claimed. The support for this limitation is provided by FIG. 2, for example.

Shaw only discloses testing whether resident software (e.g., application code 26) is intact. (See col. 3, lines 66-67, and FIG. 2, block 130). In Shaw, neither in col. 3, line 66 to col. 4, line 3; col. 5, lines 34-41; nor anywhere else, is there a mention of testing authenticity of the available software (e.g., Downloader 70). In col. 5, lines 34-41, the Downloader 70 is not checked for authenticity for the purpose of deciding whether to update the application code 26. Rather, after the Downloader 70 has been already downloaded it is authenticated and validated. (See col. 5, lines 34-35).

Therefore, since Shaw does not disclose at least the above limitations, Applicants respectfully request the Examiner to withdraw this rejection.

2. Rejection under 35 U.S.C. Section 103(a)

The Examiner rejected Claims 1, 4, 9, 12, 17 and 19 are being allegedly unpatentable over U.S. Patent No. 6,381,741 issued to Shaw. Applicants respectfully

Attorney Docket No. 990301

traverse this rejection.

Per claims 1, 21, and 23, Applicants respectfully submit that Shaw does not disclose "updating said resident software with said available software if said resident software and said available software are not authenticated; setting an authentication flag if said resident software is not authenticated but said available software is authenticated; and updating said resident software if said resident software is not authenticated but said available software is authenticated." Shaw only discloses testing whether resident software (e.g., application code 26) is intact. (See col. 3, lines 66-67, and FIG. 2, block 130). In Shaw, neither in col. 3, line 66 to col. 4, line 3; col. 5, lines 34-41; nor anywhere else, is there a mention of testing authenticity of the available software (e.g., Downloader 70). In col. 5, lines 34-41, the Downloader 70 is not checked for authenticity for the purpose of deciding whether to update the application code 26. Rather, after the code has been already downloaded it is authenticated and validated. (See col. 5, lines 34-35).

Therefore, since Shaw does not disclose at least the above limitations, Applicants respectfully request the Examiner to withdraw this rejection.

Attorney Docket No. 990301

CONCLUSION

In light of the amendments contained herein, Applicants submit that the application is in condition for allowance, for which early action is requested.

Please charge any fees or overpayments that may be due with this response to Deposit Account No. 17-0026.

Respectfully submitted,
